BLADE

Prescription and sunglasses that leave their mark

AN **exclusive** new cellulose acetate **block** devised and produced for the VANNI collection. The material structure is sliced into minute parts and all the two-tone pearly fragments compact together against a transparent underlayer.

Lime-green and burnt umber, dusky **ruby**, anthracite - with such colours one gets sharp combinations that make their mark, as befits this singular block structure.

Blade prescription comes in 6 large shapes, all acetate, suitable for progressive lenses if need be. The forms are slightly feminine and the 6 colour variants set that inner block texture against either a transparent underlayer or a top course in some 'hip' colour: petroleum-grey, ice, classic black, bright red.

Blade sunglasses are broad enough to wrap around. The hewn angular finish again picks up the 'sliced' structure of the block. Lenses tinged in classic brown or grey.

Blade is also an **exclusive necklace** made of the new acetate block matching the glasses.
